GLOBAL WEBINAR

International Glossary on Infertility and Fertility Care, 2025

Why every word matters.

Two sessions · East & West

Simultaneous translation: French & Spanish

Words shape science, care, policy, and public understanding. As science, technology, family structures, and societies evolve, so too must the language used to describe infertility and fertility care.

Join us to explore the major updates in the 4th edition of the International Glossary on Infertility and Fertility Care, 2025, learn how international consensus was achieved through the collaboration of 33 experts from across the world, and discover why precise, inclusive, and scientifically accurate terminology is essential for better data, better science, better care, and better public dialogue worldwide.

WHO SHOULD ATTEND

Reproductive health professionals, scientists, policy makers and all interested stakeholders.

EAST

Monday, 9 November 2026

09:00 UTC
